BEERMA is a fully automatic beer dispensing system. Ideal for larger events like festivals, concerts or football games, where quick and smooth tap is needed.

### Features and Benefits
- Fully automatic system
- Automatic cup dispensing
- Up to 480 beers/hour
- Web-based system
- Small, mobile, user-friendly
- Robust housing

### General Properties

| Modus              | 1) Automatic mode for plastic cups

<td>Connectivity</td>
<td>W-LAN, Bluetooth, LTE, Internet of Things</td>
</tr>
<tr>
<td>Central web-based control</td>
<td>All important information from every beer stand visible on the computer, tablet, laptop or mobile phone</td>
</tr>
</tbody>
</table>

### Design Elements
- Housing: Stainless steel
- Display: 4.3” Touchscreen
- Components: Certified components for gastronomy
- Height of the cup dispenser: Adjustable

### Technical Details
- Power input: 12 VDC
- Power consumption: 2 A Max
- Power cable: 1 m
- Energy source: Electricity

### Measures and Weight
- Dimensions: 60 x 40 x 40 cm
- Net weight: 18 Kg

### Supplied Accessories
- External power supply: Input: 100-240 VAC 0.6 A  
  Output: 12 VDC – 2 A

→ Fully automatic system

The turntable places the beer cups directly under the mobile dispensing nozzle and fills them with fresh beer. Since BEERMA has an automatic cup dispenser for up to 100 plastic cups, the pin runs smoothly and continuously.

→ Performance: Up to 480 beers per hour

BEERMA refills the cups with the dispenser from below. This increases the speed without producing too much foam. Thanks to the fully automated system, the quantity and the foam crown in each cup are identical.

→ Small, mobile, user-friendly

BEERMA can be connected to any common dispensing system. Thanks to the low net weight of 18 kg, the device can be easily transported from one point of sale to another. Even unskilled personnel can operate the device easily.

→ Web-based system

All BEERMA dispensers are connected to the Internet and are controllable on the tablet, laptop or smartphone. You can check the number of draft beers per dispenser, the total number of draft beers and other data.
